

Interdisciplinary Programs

Interdisciplinary programs of study are increasingly popular as we realize the benefits of multiple perspectives and methods to advance understanding and improve solutions. Students in the College of Arts and Sciences may pursue formal interdisciplinary programs such as the Master's degree in Cyber Security, which involves faculty from the departments of Computer Science and Criminal Justice (College of Arts and Sciences), and the Departments of Management, Information Systems Quantitative Methods, and Accounting & Finance (School of Business). Our newest Master's degree in Cultural Heritage Studies brings together art history, anthropology, and public administration.
